Summary

I am a developer with proven projects and open source, e.g. Lightdash, Codinasion, and Freeresourceshub. Currently, I am working as a freelancer. My strengths are in developing backend and frontend, ensuring their security as well as fast response.

Experience

Upwork | Freelancer   **Apr 2024 - Present**

Grabtern | Building Grabtern   **Jan 2023 - Present**
• Contributed over 4,800+ lines of code for frontend and backend, fixing issues
  and errors as well as reviewing and fixing works done by other members of the team.
• Built backend and frontend for mentor registration, user registration, verification, login,
  and dashboard, the mentor booking session

AMUPedia | Web developer   **Oct 2022 - Jan 2023**
• Built backend and frontend for the blog, blog detail, and blog comment sections with
  completely responsive web design
• Fixing many errors and issues related to the backend, and frontend

Hacktoberfest | Participant   **Oct 2022 - Nov 2022**
• Participated in Hacktoberfest and successfully made 5 Pull Requests (PRs)
• Skills used: Next.js, TypeScript, CSS3, HTML5, and React.js
